Amorphous Solid Dispersions by Spray Drying:
From Early Formulation to Commercial Lifecycle Management
(February – March – April 2023)

Session 3
Commercial Reality and Lifecycle Management of ASDs
Thursday, April 20th

4:00pm GMT | 11:00 am EDT | 5:00 pm CEST

Hovione experts featured in this session

Inês Salsinha, M.Sc.
Quality Assurance Specialist
Site QA
Hovione

Inês is a Quality Assurance specialist at Hovione's Site QA area. She joined Hovione in 2017. During four years she led ASD projects as a QA specialist and after that she joined the Drug Product Formulation group, as the QA assigned for Continuous Manufacturing. Currently, she is a subject matter expert on topics such as data analysis and statistical tools. With a great interest in digitalization, she has been enabling the implementation of Automatic Reports, such as the Product Quality Review. Inês holds a Master's degree in Pharmaceutical Sciences from Faculdade de Farmácia, Universidade de Lisboa.

Tiago Porfirio, Ph.D.
R&D Manager, Particle Engineering
Corporate Technical Services
Hovione

Tiago Porfirio is an R&D Manager in the Particle Engineering team, which is integrated within the Corporate Technical Services. Tiago joined Hovione in 2014. He has focused his research on first principle models and data science to establish model-based methodologies to expedite spray drying process development. Recently, his work has been dedicated to the post-approval stage particularly to how data, models, and prior knowledge can be applied for continuous improvement, while also focusing on risk review during lifecycle management. Tiago holds a Ph.D. in Engineering Design and Advanced Manufacturing from the University of Lisbon and is the author of two patents.
