

**Hovione Webinar****Nasal powder delivery: Process, formulation and analytical characterization****Thursday, November 30th, 2023**

11:00 am EDT | 4:00 pm GMT | 5:00 pm CEST | 8:00 am PDT

**Patrícia Henriques, M.Sc.**, is a scientist in the formulation development team of the Inhalation and Advanced Drug Delivery Group at Hovione R&D. Patrícia Henriques is a PhD candidate at the University of Coimbra and Hovione and holds a master in Pharmaceutical Sciences. Her doctoral research is focused on nasal powder delivery and the relationship between particle engineering and in vitro/in vivo performance. She has been working with Hovione since 2019, having experience in formulation development, process optimization and analytical development and characterization.

**António Serôdio, M.Sc.**, is a scientist in the Analytical development Group at Hovione R&D. He has been working in pharmaceutical analytical development for the past seven years having experience in analytical support of both oral and inhalation drug product development. In recent years, António has been part of nasal powder delivery characterization research. He holds a master in Biochemistry and has been working with Hovione since 2016.
