Identify the most promising formulations for your poorly soluble drugs

Formulation screening service for amorphous solid dispersions by spray drying.

Contact our experts today to accelerate your drug development.

Hovione 🌐

In it for life

The Platform

- Targeted at APIs with poor solubility issues
- Evaluate Spray Drying feasibility
- Designed to reduce formulation options based on performance and stability comparison
- Access to innovative proprietary excipients such as Dispersome[®] – BLG
- Maximizes the chances of identifying a successful formulation

3 Step Screening Process

In silico Computational Screening

- Controlled release
- Development by Design[™]
 ASD-HIPROS

Spray Drying Experimental Prototyping

Spray Drying experiments

- 24 Lab-Scale prototypes
- Evaluation of multiple Drug loads, Excipients and Surfactants

6 weeks, Non-GMP work, Cat.3A

Requirements:

- 5g API
- Physiochemical properties
- API safety information

Analytical testing and Solid-state characterization

- Two-Step Bio-relevant Dissolution
- Modulated Diferential Scanning Calorimetry
- One-Month Physical stability

The Deliverable

- Evaluation Formulation space definition and evaluation
- Ranking Processed analytical results and SD prototype ranking
- Formulation Identification of the optimal and most promising formulations
