

# Epidel™

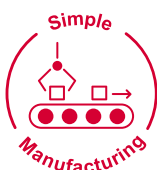

An innovative platform for extended drug delivery.

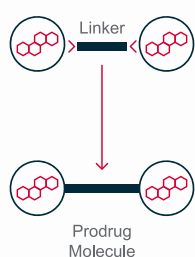

Find out more

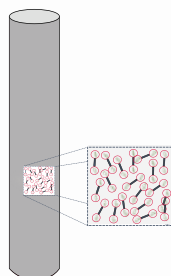

The innovative Epidel™ platform developed by Ripple Therapeutics was founded on a discovery that drugs can be designed to deliver themselves without the need for polymers or excipients. Epidel™ introduces a breakthrough approach for precise and controlled drug release offering high drug loading and bioavailability.

Simple Chemistry

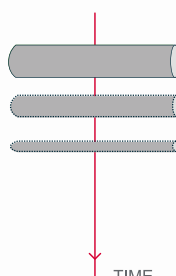

Single drug component

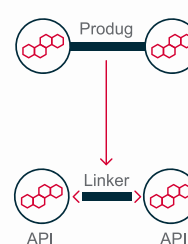

Scalable manufacturing processes

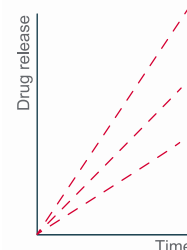

Surface-mediated drug release

Simple and defined degradation

Tunable release and duration

## Innovative, controllable & sustained drug delivery

### Simplified formulations, enhanced safety

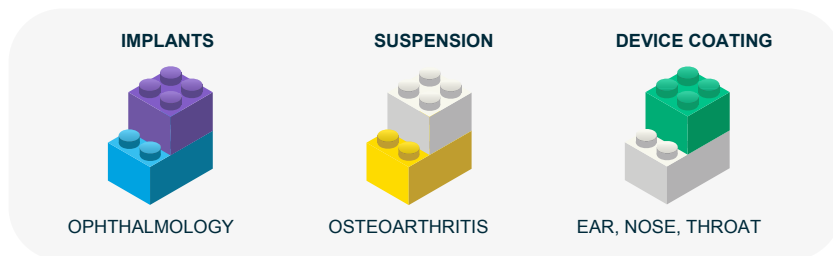

- Simpler composition: the active pharmaceutical ingredient (API) and a linker
- Decreases the formation of additional degradation products - lower risk of adverse reactions

### Tunable and controlled release for optimal therapeutic outcomes

- Epidel™ utilizes a unique surface erosion mechanism
- Smaller products with higher drug loads, precise dosing, and prolonged therapeutic effect - improved efficacy and patient compliance.

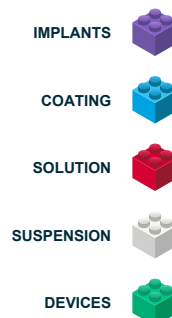

## Versatility to empower tailored drug delivery solutions

### INDICATION

Mono- OR Hetero-component

### DRUG DELIVERY FORM

Find more about a Phase II successful application of the Epidel™ Technology.

### Simplified regulatory pathways

The simplicity starts with the chemistry and goes throughout the regulatory pathway. 505(b)(2) submissions leverage from existing data, reducing costs and accelerating time to market.

### Why work with us?

By incorporating Epidel™ platform into our toolbox, Hovione offers a powerful combination of cutting-edge technology, scientific expertise, and regulatory know-how, delivering exceptional value to customers seeking for innovative drug delivery solutions.

- Deep knowledge in process chemistry including off-patent API, e.g. corticosteroids;
- Extensive experience in Particle Engineering offering advanced capabilities to optimize drug delivery;
- Strong patent portfolio;
- Efficient evaluation process;
- GMP Manufacturing capabilities.

Are you looking to an extended-release profile for your drug product?  
Or needing to capture more value on existing drugs?
